Employment

DerekEntringer.com – Interactive Media & Web Application Developer
Chicago, IL

derekentringer.com

January 2004 – Present: **Owner & Independent Contractor**

Content creation and evaluation is the most crucial element of any project. In web development, design often provides the initial "wow factor". The design and graphical imagery of a website will initially carry the load. However, when a prospective customer digs further into your website, it must be deeper than a few well placed graphics and images. If your content isn't engaging, if your site doesn't offer ideas and conversation, your prospective customers will quickly lose interest.

FlvPlayer.com – Flash Video Components

Chicago, IL

flvplayer.com

May 2008 – Present: **Partner / Interactive Programmer**

Currently creating the next generation Flv Player Flash Video Component to be released for sale on the flvplayer.com website. I have been involved in the feature set development, production, and the support of this product.

OrbySPV.com – 360 Degree Virtual Tour Technology

Chicago, IL

orbyspv.com

July 2007 – Present: **Owner / Interactive Programmer**

OrbySPV (Sequential Panoramic Viewer) gives you the ability to create highly interactive virtual tours, similar to the Google Maps Street View, using your own panoramic images. The

Orby experience is not like the other virtual tours that you may have seen around the web, where you stand in one spot and look around in a static 360 degree bubble. Orby has that ability, but instead of standing in a single position, you can actually walk around in the captured environment, stop at any position and zoom and rotate to your hearts desire.

Richter Brothers Studios

Chicago, IL

richterbrothers.com

October 2006 – February 2009: **Interactive Programmer**
